Jéssica Nepomuceno

Product Designer | UX/UI Designer

Vila Velha, ES, Brazil | +55 27 99657-1637 | jessicaneposimo@gmail.com | jessicanepomuceno.com | linkedin.com/in/nepojessica

PROFESSIONAL SUMMARY

Product Designer and UX/UI Designer with experience in B2B products, enterprise systems and web and mobile solutions, working from discovery to validation and implementation follow-up. Focused on understanding the real business problem and turning it into solutions that work for users and deliver results for the company, as in projects for Banco PAN, Itaú, Itapeva, Azul Brazilian Airlines and CAOA, and Kyno, an enterprise generative AI product. Drive work with autonomy, organization and professionalism, aligning priorities with stakeholders, product and engineering from kickoff to delivery. Before tech, I spent many years in sales, which built strong listening skills and the ability to understand needs.

PROFESSIONAL EXPERIENCE

UX/UI Designer (Freelance) | FullCodify **Nov 2023 – Present**

Vila Velha, ES, Brazil

- Independently led UX/UI projects for web and mobile solutions, from problem definition to final interface delivery;
- Structured user journeys, information architecture, complex flows and high-fidelity prototypes;
- Applied and validated design systems to ensure visual and experience consistency;
- Managed social media, visual content and content-creator partnerships for FullCodify client brands such as Yezu Beauty and Full Coworking.

UX/UI Designer | Leaf Consultoria e Sistemas **Apr 2025 – Sep 2026**

Vitória, ES, Brazil

- Worked end to end on legal and enterprise products for Banco PAN, Itaú, Itapeva, Azul Brazilian Airlines and CAOA, covering discovery, requirements, journeys, information architecture, flows, prototyping and validation;
- Ran usability tests and validation cycles with users and stakeholders, using research insights and data to guide design decisions;
- Created and evolved design systems, components and UI patterns, ensuring consistency and scalability across products;
- Translated complex business rules and requirements into digital solutions and documented flows and product guidelines, working closely with product and engineering through implementation.

UX/UI Design Intern | Timenow Engenharia **Jun 2024 – Apr 2025**

Vitória, ES, Brazil

- Designed Kyno, an enterprise generative AI product for web and mobile, with speech-to-text and a focus on accessibility;
- Created wireframes and interactive prototypes at low, medium and high fidelity;
- Supported the planning and facilitation of usability tests, interviews, benchmarking and workshops to validate hypotheses and concepts;
- Organized visual and usability patterns and components, contributing to the design system.

Communications Intern | Banestes – State Bank of Espírito Santo **Jun 2022 – Jun 2024**

Vitória, ES, Brazil

- Analyzed user feedback for the Android and iOS apps, identifying opportunities to improve the experience;
- Produced usability and user behavior reports;
- Took part in UX studies for new app features, including PIX instant payments.

FEATURED PROJECT

Kyno – Enterprise Generative AI | Timenow Engenharia **2024**

- Strategic generative AI product for Timenow's 2,500+ employees in Brazil and abroad (United States and Portugal), bringing together nearly 30 years of engineering methodologies, procedures and technical knowledge;
- Led the design with a high degree of autonomy, partnering with design leadership, from user research, interviews, benchmarking and workshops to web and mobile interfaces, including speech-to-text and accessibility;
- Presented the project to the company's director; launched at Timenow Innovation Week 2024, with around 350 employees taking part in testing;
- Project presented to leading business executives in Espírito Santo as an innovation case.

SKILLS
